ASHUTOSH KUMAR

Software Developer Full Stack Developer — React.js — Node.js — TypeScript — AWS
Gurgaon, Haryana | +91 85219 75695 | Portfolio | Mail | Linkedin | Github

EXPERIENCE

Software Developer at **Togopool Pvt Ltd** July 2025 - Present

- Engineered a **full-stack order-import workflow** mapping bulk data to application schemas, validating records, surfacing errors, processing **200k+ orders/upload**, and triggering route optimization for driver assignment.
- Orchestrated a **Real-time Notification** using **Firebase & Service Workers** for push delivery and event-driven updates.
- Integrated **Stripe P.G** into client booking workflows, handling checkout, secure card capture, and payment confirmation.
- Delivered a **Chat support system** for Dubai Emirates, enabling communication between Drivers, Pilots, and support teams.
- Designed a **full-stack corporate management panel** for a taxi client, integrating booking workflows, driver operations, real-time tracking, RBAC, and backend APIs.
- Implemented **real-time driver/vehicle tracking** using Google Maps with live location updates for Secure Express operations.
- Configured driver operations with **RBAC**, shift scheduling, and push notifications for role-specific Gala workflows.
- Optimized navigation performance by **25%** through asset splitting, route-level lazy loading, and optimized bundle delivery.
- Contributing to an **AI-powered code generation platform** using **LLM-driven** scaffolding and component generation.

Software Developer at **100acress** Oct 2024 - June 2025

- Architected a **CRM lead-management** module with auto-allocation, status tracking, and priority management, automatically **returning inactive leads to upper management** after a defined period.
- Developed **Node.js REST APIs** for CRM workflows, implementing lead allocation, status updates, role-based business logic.
- Automated deployments using **GitHub Actions, Docker, and AWS**, replacing manual releases with a CI/CD pipeline.
- Managed application deployment on **AWS EC2** with **Nginx**, configuring production environments and reverse-proxy routing.
- Crafted pixel-accurate, **responsive React interfaces** from Figma specifications with keyboard navigation and ARIA labeling.
- Restructured client state using **Redux and RTK Query**, eliminating stale-cache issues and improving API data synchronization.
- Accelerated large datasets using **virtualization and memoization**, reducing application load times by **45%**.

Software Developer - Intern at **TawglUp** Jan 2024 - Sep 2024

- Created an interactive interview **Chat system** , **Dashboard** using **WebSockets** for real-time messaging and client updates.
- Established a **real-time notification service** using WebSockets, implementing **backend event handling** for server-to-client interview status updates.

SKILLS

Languages	**JavaScript** , **TypeScript** , C++ , C
Frontend	**React.js**, **Next.js** , Redux , HTML5 , CSS3 , SCSS , Tailwind
Backend	**Node.js** , Express , REST APIs , WebSockets
Databases	**MongoDB** , **S.Q.L**
Cloud / DevOps	**AWS** , Docker, Firebase, **CI/CD** , GitHub Actions , Nginx
Testing	Jest, React Testing Library, API Testing
Engineering	Data Structures & Algorithms , OOPS , RBAC, Performance Optimization

EDUCATION

Bachelor of Computer Science, J.I.E.T Jodhpur (SGPA : 8.5/10) 2019 - 2023

PROJECTS

Real Estate SAAS Platform — React JS, Node JS, Express, MongoDB (Try It)

- Engineered a **full-stack property platform** with React/Next.js, Node/Express, MongoDB, and dynamic admin management.
- Automated **dynamic SEO configuration** via admin panel, managing metadata, slugs, and page settings without code changes.
- Enhanced On-Page SEO and load performance with server-side rendering, raising **Lighthouse score** from 27 to 73.
- Deployed on **AWS EC2** with **Nginx** reverse proxy, SSL, and caching, serving 10k+ users with stable production performance.

E-commerce Platform — React, Node/Express, MongoDB (GitHub)

- Constructed an **e-commerce platform** with React, Node/Express, and MongoDB covering products, cart, checkout, and orders.
- Developed **backend APIs** for product management and admin workflows across two applications with product allocation.
- Integrated **payment, delivery tracking, and inventory management** with synchronized stock updates across customer and admin portals.
